

Welcome

Welcome to our power point.
Myself, Conor and Seán, are going to show you the differences between clean places and places where there is lots of rubbish. We will also show you how to make the world a cleaner and better place for animals and people.

Clean Place

If there was less pollution and waste in the world, everywhere would be cleaner and look nicer.

It would stop global warming and would be much more safe.

Everybody would be happier and there would be a better environment.

Wellington, New Zealand

Wellington, New Zealand

Wellington, New Zealand is one of the cleanest places in the world. It is the capital of New Zealand. It is home to nearly 400,000 people and it's not surprising. It is so clean. It got the most tourists in the world in 2011.

Dirty Place

If the world keeps polluting global warming will continue and the conditions will be too hot to live in. Everywhere will be dirty, the environment will be ruined and it won't be safe.

Port Harcourt, Nigeria

Port Harcourt, Nigeria

Port Harcourt is one of the most polluted places in the world.

There are about 1,400,000 people living there, one of the reasons it is so polluted.
